

PRODUCT DESCRIPTION

dōTERRA Cloud™ is a waterless diffuser that quickly permeates dōTERRA CPTG® essential oils into the air, creating an intensely aromatic experience. This small yet highly durable diffuser is exclusive to dōTERRA and contains state-of-the-art, patent-pending technology that provides substantial mist diffusion with minimal noise output. dōTERRA Cloud has three customized settings, allowing the user to adjust the mist output, run time, and pause time. Additional features include an LED optional night light, a sturdy maple wood base, and a compact design that takes up minimal counter space. The dōTERRA Cloud Diffuser quickly extracts essential oils straight from the bottle, covering up to 600 square feet and filling a room with the aroma of pure essential oils for up to six hours. Immerse yourself in the benefits of aromatherapy with the dōTERRA Cloud Diffuser.
